EWC-Code: 16 03 05*

Notification-No.: SNB000030213

These waste specifications take precedence over the information provided in the notification including the declaration analysis.

General conditions for the disposal and, if necessary, the transport of the waste:

Quantity: 19 t/a

Form of delivery: Boxes on pallet

Transport: Conditions set out in the description below / free delivered at disposal facility

Waste disposal facility: AVG Hamburg

The requirements set out in the leaflets apply to delivery/collection of the waste. Compliance with these requirements is obligatory.

Leaflet:

Wood preservatives and plant protection HH

Please note

For the delivery appointment please use the attached chemical list.

This quotation only governs general conditions for specific deliveries/collections that are still to be agreed upon. We can only allocate delivery/collection dates on the basis of the respectively available capacity of the facility. Accordingly, a separate agreement is needed for each delivery/collection of waste. The quantity of waste specified in this quotation does not constitute an obligation to deliver/collect the same quantity. Instead, the quantity of waste to be disposed of will be specified in a separate binding form for each delivery/collection. Each delivery must be announced with a request. The offer is only valid if the announced quantity is confirmed.

The clause „Price surcharges for charges under public law” applies, available at [Surcharges for public-law remuneration](#). According to this clause, the remuneration stated in the offer shall be increased by a surcharge corresponding to the taxes, duties, levies and other similar charges prescribed or imposed by law, by public authorities or otherwise by virtue of public law in connection with the transport and/or disposal of the waste or the other provision of services covered by the contract ("public-law charges"). This applies in particular to the charges resulting from amendments to the Fuel Emissions Trading Act (Brennstoffemissionshandelsgesetz - BEHG), in particular the Second Act Amending the Fuel Emissions Trading Act (Zweites Gesetz zur Änderung des Brennstoffemissionshandelsgesetzes). According to the statutory provisions, from 1 January 2024, where waste is used as fuel, these emissions are also to be included in CO2 pricing, and the operators of waste disposal plants are to be obliged to purchase emission certificates per ton of CO2 emitted.

Our Standard Terms and Conditions of Business (current as of 1 June 2022) apply. These can be accessed at www.indaver.de under the menu item "Service". Our leaflets in the currently valid version can also be accessed there. If you agree with our general conditions, please confirm your acceptance of our quotation via the link or send a signed copy back to us.

We would be pleased to be of service to you. Do you need more information?
Please feel free to give us a call.
